

# Porsche Pro Packages

## Dual-Bleed Strut and Rear Shock

The world leader in suspension technology, Penske Racing Shocks have won many races and championships in F1, ALMS, Indy Car, GARRS, and NASCAR. That same race-winning technology is now offered in the highest quality strut and shock package available for Porsches.

The Pro-2 is an in-line front-strut, designed to accommodate chassis or applications that limit the packaging of a remote front canister and a rear damper with an external nitrogen reservoir. The Pro-3 is equipped with a high-speed compression canister adjustment., while the Pro-4 packages include a high and low-speed compression canister adjustment. All Pro Packages feature dual-bleed independent compression and rebound bleed adjustment shafts.

The inverted MacPherson style strut combined with a custom rear shock absorber is a proven race and street package that will add to the performance of your Porsche. Tested by both professional and advanced Porsche Club of America drivers, the Pro Package yielded quicker lap times just from simply bolting them onto the car.

-5 Hose, Banjo Swivel Style

Staubli Quick-Disconnect Fitting for Ease of Installation, Pro-3 and Pro-4

Hand Knob Option for Ease of Adjustment. Pro-4

F1 Inspired Dual Bleed Shaft Option

Pro-2 Package Shown
