

Öhlins Road & Track Car Shock Absorbers

Öhlins Racing increases the shock absorber product range for street cars that dramatically improves traction, handling and at the same time the comfort of the car. The shock absorbers are produced both in Japan and in Sweden with the specifications and development made in Sweden.

The shocks are externally adjustable, allowing the damping to be tuned to the individual preference of the driver. It can also be stripped and rebuilt to individual requirements. Focus is on high performance cars that tend to be driven hard by their owners. It's also possible to use these shocks in club-races etc. on race tracks. Some of the suspension kits have springs included. See below.

Brand	Model	Year	Front	Rear	R-h adj
Audi	A3 all 2wd	96-02	VWS7A00	WS8A00	
BMW	3-ser E36 not M3	93-99	BMS7A00	BMS8A00
